

San José State University
Computer Science Department
CS151, Object Oriented Design and Programming, 07, Spring 2021

Quick guide to using github:

1. In a browser of your choice go to github.com and create an account or login if you already have an account

2. Once you have an account and login, go to the menu on the upper right:

3. Click on your repositories
4. Click on "New" button
5. Fill in the fields. Make sure to name your repo "**SJSU_CS151_S2021**", make sure your repository is private, add README upon initialization

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

Repository name *

ynewton

/ SJSU_CS151_F2020

Great repository names are short and memorable. Need inspiration? How about [vigilant-octo-goggles?](#)

Description (optional)

This is a repository for CS151 section 6 fall 2020 class

☐
Public

Anyone on the internet can see this repository. You choose who can commit.

☒
Private

You choose who can see and commit to this repository.

Skip this step if you're importing an existing repository.

☒ **Initialize this repository with a README**
This will let you immediately clone the repository to your computer.

Add .gitignore: None

Add a license: None

i

Create repository

6. Click “Create repository” button
7. Click on “Code” button and copy the URL in the text box:

Go to file
Add file
Code

Clone with HTTPS
Use SSH

Use Git or checkout with SVN using the web URL.

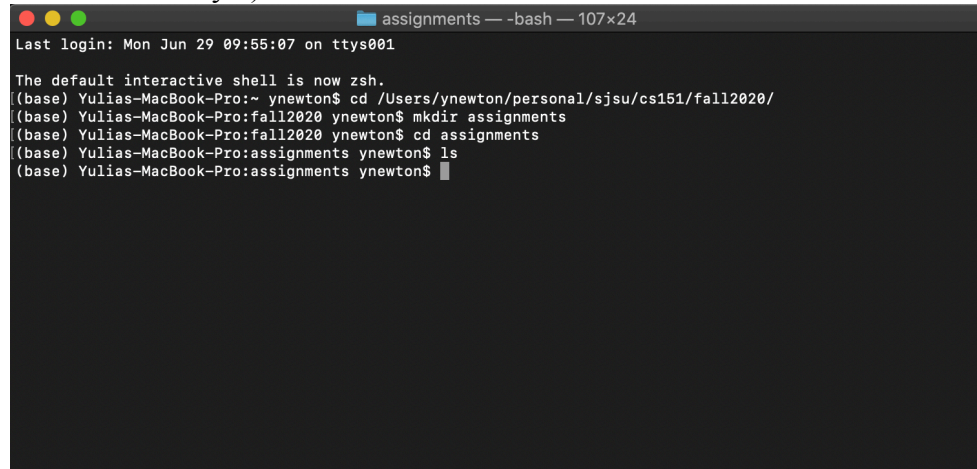

https://github.com/ynewton/SJSU_CS1

Open with GitHub Desktop

Download ZIP

8. Go to the terminal/command line window on your computer/laptop and navigate to the directory where you would like to create and work on files for this class
 - a. Use `cd` command to go to a directory
 - i. E.g. “`cd my_directory`” goes to the directory called `my_directory`
 - b. Use `mkdir` command to create a new directory
 - i. E.g. “`mkdir my_directory`” creates a directory named `my_directory`
 - c. Use `pwd` command to show full path of where you currently are
 - i. E.g. “`pwd`” displays full path, no additional parameters are needed
 - d. Use `ls` command to show the content of the current directory
 - i. E.g. “`ls`” displays the contents without any additional parameters

Below is an example of my terminal window. I navigated to “/Users/ynewton/personal/sjsu/cs151/spring2021/” directory, created a new directory named “assignments” in there, navigated into the newly created directory, and listed the contents (there are no files or directories in it yet).

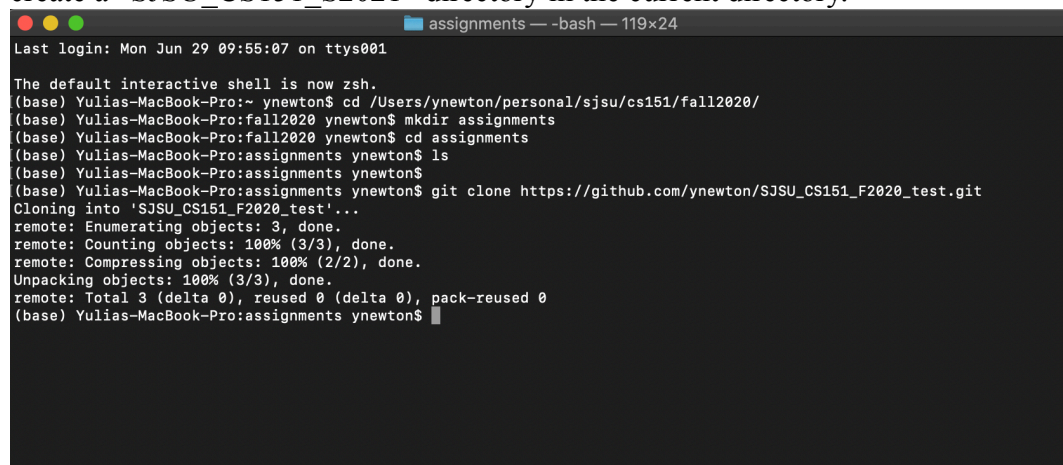

```

assignments — -bash — 107x24
Last login: Mon Jun 29 09:55:07 on ttys001

The default interactive shell is now zsh.
(base) Yulias-MacBook-Pro:~ ynewton$ cd /Users/ynewton/personal/sjsu/cs151/fall2020/
(base) Yulias-MacBook-Pro:fall2020 ynewton$ mkdir assignments
(base) Yulias-MacBook-Pro:fall2020 ynewton$ cd assignments
(base) Yulias-MacBook-Pro:assignments ynewton$ ls
(base) Yulias-MacBook-Pro:assignments ynewton$

```

9. Type in the following command “*git clone paste_url_you_copied_from_the_repo_here*”. You will see some output from this command as the repo is being linked to. It will also create a “SJSU_CS151_S2021” directory in the current directory.

```

assignments — -bash — 119x24
Last login: Mon Jun 29 09:55:07 on ttys001

The default interactive shell is now zsh.
(base) Yulias-MacBook-Pro:~ ynewton$ cd /Users/ynewton/personal/sjsu/cs151/fall2020/
(base) Yulias-MacBook-Pro:fall2020 ynewton$ mkdir assignments
(base) Yulias-MacBook-Pro:fall2020 ynewton$ cd assignments
(base) Yulias-MacBook-Pro:assignments ynewton$ ls
(base) Yulias-MacBook-Pro:assignments ynewton$
(base) Yulias-MacBook-Pro:assignments ynewton$ git clone https://github.com/ynewton/SJSU_CS151_F2020_test.git
Cloning into 'SJSU_CS151_F2020_test'...
remote: Enumerating objects: 3, done.
remote: Counting objects: 100% (3/3), done.
remote: Compressing objects: 100% (2/2), done.
Unpacking objects: 100% (3/3), done.
remote: Total 3 (delta 0), reused 0 (delta 0), pack-reused 0
(base) Yulias-MacBook-Pro:assignments ynewton$

```

10. Go into SJSU_CS151_S2021 directory by using this command “*cd SJSU_CS151_S2021*”
11. Create “Assignment1” directory by using this command “*mkdir Assignment1*”
 - a. You can also create Assignment2, Assignment3, Assignment4, Assignment5, Assignment6, and Assignment7 directories at this time using mkdir command. However, you can also create them later when you are working on those assignments.
12. Create “about_me.txt” file using your favorite text editor and place it in the previously created Assignment1 directory. You can also use one of the command line editors to do that (e.g. vi or vim). Create the contents of this file as was directed in the instructions for

this assignment. Don't forget to save the file. Now your Assignment1 directory should list one file named "about_me.txt". You now made changes to your project which are not in git repo yet.

```

(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ cd Assignment1
(base) Yulias-MacBook-Pro:Assignment1 ynewton$ ls
about_me.txt
(base) Yulias-MacBook-Pro:Assignment1 ynewton$

```

13. You can view the status of your repository to confirm which changes have not been committed/pushed yet. Use "*git status*" command for that.

Here, it tells me that Assignment1 directory is not currently being tracked by my repository. Assignment2, Assignment3, and so on directories I created are not displayed here because the repository only tracks files and not empty directories. As soon you place appropriate files into those directories they will show up in the output of "*git status*" command as not being tracked yet.

```

(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ pwd
/Users/ynewton/personal/sjsu/cs151/fall2020/assignments/SJSU_CS151_F2020_test
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git status
On branch master
Your branch is up to date with 'origin/master'.

Untracked files:
  (use "git add <file>..." to include in what will be committed)

    Assignment1/

nothing added to commit but untracked files present (use "git add" to track)
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$

```

14. To add it to my repository I just need to type in "*git add Assignment1*" command

```

(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git status
On branch master
Your branch is up to date with 'origin/master'.

Untracked files:
  (use "git add <file>..." to include in what will be committed)

    Assignment1/

nothing added to commit but untracked files present (use "git add" to track)
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git add Assignment1/
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git status
On branch master
Your branch is up to date with 'origin/master'.

Changes to be committed:
  (use "git reset HEAD <file>..." to unstage)

    new file:   Assignment1/about_me.txt
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$

```

15. Now we have to commit this change to the local repository by using the following command:

git commit -m "these are my assignment1 changes"

```

SJSU_CS151_F2020_test — -bash — 109x23
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git commit -m "these are my assignment1 changes"
[master 38ba850] these are my assignment1 changes
1 file changed, 12 insertions(+)
 create mode 100644 Assignment1/about_me.txt
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git status
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
  (use "git push" to publish your local commits)

nothing to commit, working tree clean
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$

```

16. The changes have now been committed to the local repository but have not been pushed to the remote repository server yet. To do that use *"git push"* command

```

SJSU_CS151_F2020_test — -bash — 109x23
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git commit -m "these are my assignment1 changes"
[master 38ba850] these are my assignment1 changes
1 file changed, 12 insertions(+)
 create mode 100644 Assignment1/about_me.txt
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git status
On branch master
Your branch is ahead of 'origin/master' by 1 commit.
  (use "git push" to publish your local commits)

nothing to commit, working tree clean
(base) Yulias-MacBook-Pro:SJSU_CS151_F2020_test ynewton$ git push
